OILENNIUM
Part of the Petrofac Group
Oilennium is a Leading training provider to the global energy industry. We supply a wide range of innovative products and services.
Digital Solutions

Custom-designed Courses
Oilennium has built hundreds of bespoke eLearning courses. Our Subject Matter Experts and Instructional Designers work side by side with our clients to ensure technical accuracy and the delivery of excellent learning material.

Instructor-led Training
Clients often commission Oilennium to develop new interactive classroom courses. In addition to developing new courses, Oilennium frequently enhance existing training for clients with high quality animations. Courses are supported by trainer, student and field guides. Our courses are interesting and engaging, delivering high quality interactive feedback.

Library Courses
Our library courses are used by a wide range of oil and gas clients all over the world, and thousands of eLearning certificates are awarded to service companies, operators and vendors each year. And if our library course isn’t exactly what you need, we can customise it to suit your requirements.

Animations/Digital Video
Animations and digital videos are used to enhance learning materials. Our asset library is populated with images and bespoke animations; from drilling, completions, production, process and pipelines, to HSE and behavioural safety videos.

Online Simulators
Oilennium supplies a range of library and bespoke simulators. Our simulators are simple in design and highly effective for the learner, allowing them to practice hands-on techniques without the risk of incident or expensive mistakes.

Learning Management System (LMS)
An LMS is essential for clients who need a permanent and flexible eLearning delivery platform and tracking tool. The Oilennium LMS is powerful, it delivers learning to individuals and companies globally, provides tracking and can be integrated with other systems. We also build bespoke Learning Management Systems for our clients.

Translation Services
In addition to translated courses currently available on Oilennium’s Learning Management System, we also offer a full range of translation services (including regional dialects) for bespoke eLearning courses, digital animation and interactions. Our suite of library courses and language options are constantly expanding, with new language options becoming available regularly.

Training Consultants
Consultancy services are available to help clients meet their requirements including: Training Needs Analysis, Subject Matter Experts, eLearning development and implementation, competency, and learning management systems.

Reporting
Oilennium can develop customised dashboard reports to suit your requirements. We can take the data from your Oilennium-developed LMS and present it in a clear, ‘at a glance overview’ via a simple web link. We can develop both user and course-based reports, as well as a host of other customised features.
At Oilennium we don’t just tell, we teach

To ensure that knowledge is transferred efficiently and retained by learners, Oilennium uses high quality graphics, animation and interaction. This has the added bonus of keeping the user engaged throughout the learning experience. At Oilennium we focus on learning, we aim to ensure that no matter where our users are located; they can improve their knowledge by taking our courses.

Track Record

We have been commissioned by companies globally to develop online training programmes and instructor-led training materials. We work in every sector of the oil and gas industry and have completed projects in all of the following disciplines:

**Upstream**
- Coiled Tubing
- Drilling
- Drilling Engineering
- Pressure Control
- Snubbing
- Wireline

**Midstream**
- Pipeline Calculations
- Pipeline Cleaning
- Pipeline Inspection
- Pipeline Pigging

**Downstream**
- Chemical Cleaning
- Fluid Pumping
- Leak Detection
- Nitrogen Pumping
- Nitrogen Purging
- Nitrogen Safety
- Process Systems
- Refrigeration
- Separation

**HSSEQ**
- Control of Work
- Dropped Objects
- Environmental Awareness
- HAZOP
- HAZID
- Inductions
- LOTO
- Risk Assessment
- Risk Management
- SIRP
- Security
- Quality

**Commercial & Legal**
- Anti-Corruption
- Tenders
- Commercial Awareness

**Software**
- HR Software
- Well Services Software

**Clients include:**
- ADCO
- Amec
- Archer
- Asset Guardian
- AF Global Corporation
- Aker Subsea
- Baker Hughes
- BP
- Centrica
- Chevron
- ConocoPhillips
- Delta Subsea
- Enbridge Pipelines
- EnerMech
- Halliburton
- Hydratight
- IKM Group
- International Well Control Forum
- KCA Deutag Drilling
- Marathon
- OMV
- Pacific Drilling
- Perenco UK
- Petrofac Group
- PNS
- Portage College
- Precision Drilling
- Scantech
- Seajacks Crewing Services
- Shelf Drilling
- Shell
- Snap on Tools
- Stats Group
- Stimwell Services
- Subsea 7
- Sureclean
- Talisman
- Tervita
- T H Hill
- Transocean
- Trican Well Services
- VAM Field Services
- Weir Seaboard
- Weatherford
- Ziebel
Competence Management with SkillsVX

By combining the SkillsVX Competence Management System with the power and deliverability of Oilennium, employers are now offered a true blended learning and training management solution for their entire global workforce.

SkillsVX identifies, tracks and exposes skills gaps. This gives both you and your employees the power to maintain training requirements, certification and competencies specific to each trade.

Identifying gaps in your workforce’s competency, managing the training budgets and having the ability to plan training in advance are all possible with the SkillsVX and Oilennium integrated system.

► Assurance of competence and compliance
► Budgeting and procurement of training
► Integrated with Oilennium’s Learning Management System
► Optimised for low bandwidth
► Persons On Board, time writing
► Strategic worldwide development
Online training modules are available 24/7 from any location around the world.
